Violent Offenders Aug 08 2020 Offenders convicted of violent crimes accounted for almost 15,000 (7.5%) of the federal inmate population in recent reports; and, despite the public's perception that the overall crime rate is down, there are indications that rates of violent crime may actually be increasing in certain geographic areas and populations. In response, forensic psychologists are increasingly being called upon to understand the causes of violence, predict violent behavior and the likelihood of recidivism, develop treatment programs, and even assist law enforcement in solving crimes. The assessment of violence is an ever-evolving field of study and the need for updated analysis of personality constructs, etiological links, corollary elements, and tools for violence prediction are of primary import. *Violent Offenders* addresses the numerous challenges and issues facing individuals working with this population and provides broad coverage regarding specific groups of violent perpetrators. It looks at a wide-range of topics and offending populations including violent children and adolescents, intimate partner violence, terrorism, sexually based crimes, gang violence, institutional violence, and violence perpetrated by police officers. Skillfully edited by Christina Pietz, a forensic psychologist, and Curtis Mattson, a clinical psychologist, this volume offers insight into current psychological theories of violence and addresses the links, both evident and assumed, between psychological disorders and violence. Chapters are authored by leaders in their fields and cover topics such as the psychiatric treatment of violent behavior, assessment and prediction of risk for future dangerousness, special considerations for ethical conduct, research considerations, and the etiological associations of violence with neurophysiology, substance abuse, and environment. *Violent Offenders* will benefit clinicians and professionals working in correctional and forensic fields and is appropriate for use in clinical and counseling graduate programs that offer specialized training in correctional and/or forensic psychology and for courses in deviant behavior and setting-specific assessment.
