HCI Models, Theories, and Frameworks Oct 22 2021 HCI Models, Theories, and Frameworks provides a thorough pedagogical survey of the science of Human-Computer Interaction (HCI). HCI spans many disciplines and professions, including anthropology, cognitive psychology, computer

graphics, graphical design, human factors engineering, interaction design, sociology, and software engineering. While many books and courses now address HCI technology and application areas, none has addressed HCI's multidisciplinary foundations with much scope or depth. This text fills a huge void in the university education and training of HCI students as well as in the lifelong learning and professional development of HCI practitioners. Contributors are leading researchers in the field of HCI. If you teach a second course in HCI, you should consider this book. This book provides a comprehensive understanding of the HCI concepts and methods in use today, presenting enough comparative detail to make primary sources more accessible. Chapters are formatted to facilitate comparisons among the various HCI models. Each chapter focuses on a different level of scientific analysis or approach, but all in an identical format, facilitating comparison and contrast of the various HCI models. Each approach is described in terms of its roots, motivation, and type of HCI problems it typically addresses. The approach is then compared with its nearest neighbors, illustrated in a paradigmatic application, and analyzed in terms of its future. This book is essential reading for professionals, educators, and students in HCI who want to gain a better understanding of the theoretical bases of HCI, and who will make use of a good background, refresher, reference to the field and/or index to the literature. Pre-Inca and Inca Pottery Jan 31 2020 This volume presents a collection of articles which offer different perspectives for archaeological pottery studies, regarding the understanding of pre-

Hispanic social practices in Quebrada de Humahuaca, Argentina. The aim of this volume is to contribute to Quebrada de Humahuaca archaeological knowledge and its inclusion in current discussions about Andean and worldwide history of pottery production. In 2003, Quebrada de Humahuaca was made a UNESCO World Heritage Site. Numerous tracks, roads and settlements testify to its pre-Hispanic and post pre-Hispanic history from pre-ceramic to colonial times. Due to its strategic position Quebrada de Humahuaca has been colonized by both the Inca and the Spaniards. It also has been a stage for many battles of the Argentine War of Independence. The richness and abundance of ceramic material evidence in the landscape of the Quebrada de Humahuaca has provided archaeologists information about human behaviour and social practices both in every and ritual activities. Quebrada de Humahuaca, in the province of Jujuy (the northernmost sector of Argentina) is one of the most widely recognized archaeological zones and one of the most widely studied. Through extensive excavations of the most conspicuous settlements, archaeologists managed to characterize these pre-Hispanic agricultural societies and construct chronologies of northwestern Argentina, and to elaborate models of trans-Andean population dynamics.

In Mortal Combat Sep 20 2021 A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of *The Rising Sun* and *Infamy*. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and

riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In *Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

Conservative Politics in National and Imperial Crisis May 05 2020 Whilst serving in the prestigious post of Viceroy of India between 1926 and 1931, Lord Irwin (later the Earl of Halifax) was kept informed about political events in Britain by frequent and lengthy letters from Cabinet Ministers, senior Conservative MPs and other prominent figures, such as the editor of The Times.

Covering events from the General Strike of May 1926 to Irwin's negotiation of a pact with Gandhi in March 1931, these private and previously unpublished letters mix analysis and gossip. They offer a frank account from within the highest political circles of the Baldwin government of 1924-29 and the serious crisis in the Conservative Party which followed in 1929-31. There is also much commentary on major figures such as Stanley Baldwin, Neville Chamberlain, Winston Churchill and Ramsay MacDonald. Of great depth and richness, and emanating from experienced and shrewd political insiders, this collection is an essential historical source for British history between the two world wars.
