2022 This book presents selected papers from the 10th International Conference on Information Science and Applications (ICISA 2019), held on December 16-18, 2019, in Seoul, Korea, and provides a snapshot of the latest issues regarding technical convergence and convergences of security technologies. It explores how information science is at the core of most current research as well as industrial and commercial activities. The respective chapters cover a broad range of topics, including ubiquitous computing, networks and information

systems, multimedia and visualization, middleware and operating systems, security and privacy, data mining and artificial intelligence, software engineering and web technology, as well as applications and problems related to technology convergence, which are reviewed and illustrated with the aid of case studies. Researchers in academia, industry, and at institutes focusing on information science and technology will gain a deeper understanding of the current state of the art in information strategies and technologies for convergence security.

[The Logic of Education \(RLE Edu K\)](#) Oct 02 2022

This book explores the implications for the curriculum, for teaching and for the authority structure of schools and colleges of an analysis of 'education' in which the development of knowledge and understanding is accorded a central position. The book explains what philosophy of education is, and by concentrating on its central concepts, initiates readers into exploring it for themselves. It also serves as a succinct introduction to the growing literature on philosophy of education in the UK.
