Principles of Business Taxation (2015) Oct 27 2022 The CCH Principles of Business Taxation course approaches the study of taxation from the perspective of the student who will become a business person faced with decisions that are inevitably affected by tax considerations. This perspective leads to a very different coverage in this textbook -- coverage that is useful for accounting, finance and general business majors. The new edition focuses on the central concepts that build our tax framework and avoids small exceptions. Students studying with this book will confidently master the critical underpinnings of federal taxation and gain a stronger, more solid understanding of federal tax principles. Many items that pertain specifically to businesses (for example, inventory valuation issues)

usually not discussed in a traditional undergraduate tax textbook are covered in this book. Although so many of the exclusions, deductions, and credits apply equally to individual and corporate taxpayers, this book focuses on the business perspective. An advantage to this approach is that most of the students who take only one course in taxation will learn how businesses are taxed and, in turn, will have a better appreciation for how taxes affect business decisions. Another advantage to this approach is that the topics dovetail into other business, finance and accounting course work. The focus is on concepts and how taxes affect business decisions. This includes various business entities including closely held business, pass-through entities and sole proprietorships.

The Artful Aussie Tax Dodger Jun 11 2021 In *The Artful Aussie Tax Dodger* Lex Fullarton studies the impact of 100 years of taxation legislation in Australia 1915–2016. He finds that despite the lessons of a century of actions and reactions of taxpayers and administrators little changes—despite entering a new century old habits are hard to break. At Federation on January 1, 1901, the Commonwealth of Australia was empowered to impose income tax on its citizens. However, it was not until September 3, 1915 that it began a century of 'tax reform' when its first Income Tax Assessment Act was introduced. For 100 years, driven by the winds of various political and social interests, Australia 'reviewed and reformed' its tax legislation. Fullarton studies that transformation. Fullarton's examination considers the oldest of tax planning entities—the British Trust ('received' in Australia at colonisation)—, the introduction of Australia's 'reformed' consumption tax—its VAT, referred to as Goods and Services Tax (GST) in Australia—, an analysis of tax avoidance schemes, and finally government taxation reform activities over the century. Fullarton notes that, just one year into a new century of taxation, the Australian Federal Government put forward a proposal to go forward to the past by repealing certain sections of the Income Tax Assessment Act and transferring Income Taxing powers back to the Australian States, a position which existed prior to 1936. This book looks at how Australia's tax legislation was grounded, added to, avoided, and evolved, until it went 'Back to the Future'. It is a collection of studies compiled from a rich mosaic of experience and research conducted over 20 years of involvement in taxation law in rural and remote Australia.
