Elvis and the Tropical Double Trouble May 11 2021 It's two times the turmoil for mayhem magnet Callie, her curvaceous cousin Lovie, and Elvis, the King reincarnated as nothin' but a hound dog. This time they're finding a lot more than relics on an archeological dig that could truly be their ruin. . . Forced to choose between one man who wants to marry her and another who already did, Callie Valentine Jones can't think of a better way to check out of her personal Heartbreak Hotel than to get way, way out of town. So when Lovie invites the whole Valentine clan to visit her brainy new beau's worksite near Cozumel, Callie packs up her crooning basset hound and heads straight for the airport. But the moment they arrive at the dig, Elvis sniffs

out T-R-O-U-B-L-E, in the form of a skeleton too fresh to be part of the research and too dead to spell anything but homicide. Suspicious minds blame ghosts and gods, but Callie knows the guilty party is all too human-and for once, she's determined not to get involved. That determination goes right out the window when Lovie and Elvis go missing. It's now or never, if Callie wants to save her cousin and her canine from someone who's got murder always on his mind. And when her sexy ex arrives to save the day, she'll have to keep her head together, because her love won't wait-but neither will a killer with something deadly to hide.

Double Trouble Sep 15 2021 J. Phillip Thompson III, an insider in the Dinkins administration, provides the first in-depth look at how the black mayors of America's major cities achieve social change. Black constituents naturally look to black mayors to effect great change for the poor, but the reality of the situation is complicated. Thompson argues that African-American mayors, legislators, and political activists need to more effectively challenge opinions and public policies supported by the white public and encourage greater political inclusion and open political discourse within black communities. Only by unveiling painful internal oppressions and exclusions within black politics will the black community's power increase, and compel similar unveilings in the broader interracial conversation about the problems of the urban poor. Tracing the historical development and contemporary practice of black mayoral politics, this is a fascinating study of the motivations of black politicians, competing ideologies in the black community and the inner dynamics of

urban social change.

Double Trouble Nov 17 2021 The double, doppelgänger, is mostly understood as a peculiar figure that emerged in nineteenth-century Romantic and gothic literature. Far from being a merely esoteric entity, however, this book argues that the double, although it mostly goes unnoticed, is a widespread phenomenon that has significant influence on our lives. It is an inherent key element of human subjectivity whose functions, forms, and effects have not yet gained the serious consideration they merit. Drawing on literature, philosophy, and psychoanalysis, and combining a personal story with theoretical interventions, Double Trouble develops a novel understanding of the double and human subjectivity in the last two centuries. It begins with the singular and narcissistic double of Romanticism and gradually moves to the multiple doubles implicated by Postmodernism. The double is what defies unicity and opens up the subject to multiplicity. Consequently, it gradually emerges as a bridge between the I and the Other, identity and difference, philosophy and literature, theory and praxis.

Sturtevant Dec 06 2020 Known for her early repetitions of the work of her contemporaries including Jasper Johns, Roy Lichtenstein, Claes Oldenburg, James Rosenquist and Andy Warhol Sturtevant turned the visual logic of Pop art back on itself, using Duchamps model of the readymade to probe uncomfortably at the workings of art history in real time. Yet the aspect of her work that allowed her to be described as the one artist who cant be copied her chameleon-like embrace of other artists art is also what has allowed her to be largely overlooked in the history of postwar American art. As a woman making versions of the work of better-known male artists, she has passed almost unnoticed through the hierarchies of mid-century modernism and postmodernism, at once absent from these histories while nevertheless articulating their

structures. Despite a rising reputation in Europe, Sturtevant is still largely unknown in her home country. Published to accompany the first retrospective of her work in a US museum since 1973, at The Museum of Modern Art, this publication considers Sturtevant as a uniquely American artist, with political concerns inflected specifically by her upbringing and adult life in the US. Featuring previously unpublished drawings and sketches from the artists archive, the book includes an essay by the exhibition curator that provides a comprehensive overview of the artists practice while situating it more concretely within American culture.

Vibrant Matter Nov 24 2019 In *Vibrant Matter* the political theorist Jane Bennett, renowned for her work on nature, ethics, and affect, shifts her focus from the human experience of things to things themselves. Bennett argues that political theory needs to do a better job of recognizing the active participation of nonhuman forces in events. Toward that end, she theorizes a “vital materiality” that runs through and across bodies, both human and nonhuman. Bennett explores how political analyses of public events might change

were we to acknowledge that agency always emerges as the effect of ad hoc configurations of human and nonhuman forces. She suggests that recognizing that agency is distributed this way, and is not solely the province of humans, might spur the cultivation of a more responsible, ecologically sound politics: a politics less devoted to blaming and condemning individuals than to discerning the web of forces affecting situations and events. Bennett examines the political and theoretical implications of vital materialism through extended discussions of commonplace things and physical phenomena including stem cells, fish oils, electricity, metal, and trash. She reflects on the vital power of material formations such as landfills, which generate lively streams of chemicals, and omega-3 fatty acids, which can transform brain chemistry and mood. Along the way, she engages with the concepts and claims of Spinoza, Nietzsche, Thoreau, Darwin, Adorno, and Deleuze, disclosing a long history of thinking about vibrant matter in Western philosophy, including attempts by Kant, Bergson, and the embryologist Hans Driesch to name the “vital force” inherent in material forms. Bennett concludes by sketching the contours of a “green materialist” ecophilosophy.
