Success and failure in the UK car manufacturing industry Sep 30 2022 Although initially sparked by the collapse of MG Rover, this inquiry into the UK automotive industry was broadened to examine the following subjects: the principal reasons for the different records of success by different companies; how companies arrive at investment and closure decisions; the role played by trade unions; the appropriate Government response to closure announcements and what the Government could do to help the supply chain and workforce if plants are closed. Overall it foresees mixed prospects for car manufacturing in this country and thinks it is important that the industry and Government put extra effort into improving skills, increasing R&D, adopting lean manufacturing techniques and strengthening the local supply chain.

Lean Thinking Aug 06 2020 Lean Thinking was launched in the fall of 1996, just in time for the recession of 1997. It told the story of how American, European, and Japanese firms applied a simple set of principles called 'lean thinking' to survive the recession of 1991 and grow steadily in sales and profits through 1996. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and more efficient. Now we are dealing with the recession of 2001 and the financial meltdown of 2002. So what happened to the exemplar firms profiled in Lean Thinking? In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.

Advertising as Multilingual Communication Jan 29 2020 Advertising has traditionally communicated messages to consumers with strong local and national identities.

However, increasingly, products, producers, advertising agencies and media are becoming internationalized. In the development of strategies that appeal to a large multinational consumer base, advertising language takes on new 'multilingual' features. The author explores the role of advertising language in this new globalized environment, from a communicative theory point of view, as well as from a close linguistic analysis of some major advertising campaigns within a multicultural and multilingual marketplace.

Within the Secret State Dec 22 2021 Ours is an increasingly regulated society. For 40 years Peter Evans has been watching the way the state uses power and the inexorable rise of the surveillance society, damaging freedom and institutions. A Times journalist for 30 years and Home Affairs Correspondent for 17, he has enjoyed a privileged position as an informed observer of the Secret State. The surveillance society is part of a trend that puts systems first and people second. This it tries to justify as necessary for our own protection. The threat of terrorism is real enough, but our fear of it is being exploited to undermine our civil liberties. Central to this process is MI5, with its growing power, its lack of public accountability, its harassing of individuals and use of smear tactics, together with its failures over the attacks on London which killed 52 people and threatened the lives of many more. In *Within the Secret State* Peter Evans shows how individuals and institutions -the police, the armed forces, the judiciary, the prison service, the National Health Service and journalists - have all suffered from encroachment and interference by a centralising bureaucracy. This is a timely and important book that provides us with a stark contemporary warning - never to lower our guard when liberty is threatened.
