The Evolution of Legal Business Forms in Europe and the United States Aug 30 2022

The evolution of partnership forms is stimulated by powerful economic forces that can lead to widespread prosperity and wealth creation for a society. Given the importance of closely held firms in the United States and Europe, The Evolution of Legal Business Forms in Europe and the United States argues that partnership law should trouble itself less with historical and descriptive arguments about the legal rules and structure of the partnership form and focus much more on the new analytical apparatus of the economics of organizational form as well the fundamental economic learning that informs the debates on limited liability, partnership rules regarding management and control, conflict resolution and fiduciary duties. Introducing and extending the best available theories from law and economics, particularly those from the theory of the firm, This book?s analysis demonstrates that the patterns of European partnership law and its recent history are best understood from an economic and comparative law perspective. By examining the economic theories of the firm and the economics of organization choice, The Evolution of Legal Business Forms in Europe and the United States conceives partnership-

type business forms as contractual entities. The key feature of the modern partnership form is that partners have significant flexibility and power to limit their liability, transfer all of their rights, and to freely exit the firm. Another key feature of partnership law is the insight that lawmakers should provide the rules and enforcement mechanisms to regulate the important relationships within the partnership. This book applies an efficiency test to determine which sets of default rules are likely to resolve the main problems in partnerships. Having identified partnership law with the economic theory of organization, *The Evolution of Legal Business Forms in Europe and the United States* then goes to argue that most of partnership law is directed at offering bundles of legal rules for different types of firms. Lawmakers should promote partnership rules that attract investors and can be expected to be efficient if they allow entrepreneurs to freely select the bundle of rules that best match their priorities. In a modern vision of partnership law, lawmakers promote economic welfare through creating non-mandatory rules that allow multiple businesses to switch to a favourable business form without significant costs. Jurisdictions plagued by falling incorporations and low levels of small and medium business activity, should abandon the mandatory and standardized framework and the 'lock in' effect that it promotes, and focus on the mechanisms of legal evolution and rules that tend to mimic the market. This innovation work will have ramifications felt across European jurisdictions, and will be debated by a large audience of policymakers and academic lawyers involved in law reform. Moreover, the book will receive serious attention from students of law and economics, as well as practising lawyers involved in resolving complex issues of organizational law. Review (s) Vermeulen's work makes a significant contribution to the dialogue between legal scholars and policy makers from Europe and the United States on the matter of business entity law reform. The volume is ambitious in scope, thoughtful in approach, and accurate in result. It shows a well-read and nuanced view of the recent American partnership law reform debates. He moves with assurance between different systems of law and analysis, and has a confident sense of what his diverse readers need to know to come to the ultimate discussion with a common sense of the issues and alternatives at hand. Vermeulen's work should serve as a starting point for a robust discussion among scholars and policy makers.

Mapping European Corporations Jun 15 2021 This book addresses the evolution of the strategies, structures, ownership patterns and performances of large European corporations since the early 1960s. The

authors study large and small countries, in order to understand how the process of economic integration has affected the patterns of growth and the structural characteristics of the largest firms. Drawing both on extensive databases and on case studies, the contributions in this volume address the peculiar specificities of large firms in different national contexts, adopting a longitudinal, long term perspective. This volume delivers the first results of an international, collective research effort undertaken by several national teams. The 'Mapping Corporate Europe' project aims to provide a detailed account of the structural traits of the European Corporation in a framework which includes (i) a chronological analysis over 50 years, starting with the Rome treaty in 1957; (ii) geographical extension beyond previous analyses for France, Germany and the UK, by including smaller countries; (iii) firms from other industries in addition to manufacturing companies; and (iv) attention to internationalisation of European firms. These analyses form the basis of a rich description of the developments of large European corporations over the past five decades, using both qualitative and quantitative approaches. This book was originally published as a special issue of Business History.

Digital Finance in Europe: Law, Regulation, and Governance Jul 29 2022 Global finance is in the middle of a radical transformation fueled by innovative financial technologies. The coronavirus pandemic has accelerated the digitization of retail financial services in Europe. Institutional interest and digital asset markets are also growing blurring the boundaries

between the token economy and traditional finance. Blockchain, AI, quantum computing and decentralised finance (DeFI) are setting the stage for a global battle of business models and philosophies. The post-Brexit EU cannot afford to ignore the promise of digital finance. But the Union is struggling to keep pace with global innovation hubs, particularly when it comes to experimenting with new digital forms of capital raising. Calibrating the EU digital finance strategy is a balancing act that requires a deep understanding of the factors driving the transformation, be they legal, cultural, political or economic, as well as their many implications. The same FinTech inventions that use AI, machine learning and big data to facilitate access to credit may also establish invisible barriers that further social, racial and religious exclusion. The way digital finance actors source, use, and record information presents countless consumer protection concerns. The EU's strategic response has been years in the making and, finally, in September 2020 the Commission released a Digital Finance Package. This special issue collects contributions from leading scholars who scrutinize the challenges digital finance presents for the EU internal market and financial market regulation from multiple public policy perspectives. Author contributions adopt a critical yet constructive and solutions-oriented approach. They aim to provide policy-relevant research and ideas shedding light on the complexities of the digital finance promise. They also offer solid proposals for reform of EU financial services law.

The European Private Company - Societas Privata Europaea (SPE) Mar 25

2022 The planned European legal form Societas Privata Europaea (SPE) is a limited liability company of a closed group of shareholders, and thus is comparable to the German GmbH. At the European-level, the SPE serves as a supplement to the European Limited Liability Company (SE), which proved to be too difficult for small and medium-sized companies for various reasons. The SPE will be introduced on the basis of a European regulation, the content of which has been largely agreed to by the member states.

Capital Directive in Europe Jun 23 2019 This book provides an overview of the Second Council Directive 77/91/EEC of 13 December 1976 (also known as the Capital Directive) and its implementing rules in each Member State of the European Union and the European Economic Area. It provides companies and advisors with useful insights regarding articles of association and related documents, the incorporation and capital requirements of European companies with limited liability and the rules applicable to the acquisition and pledge of their own shares, the cross-participations, the financial assistance and the distribution of profits. A general report on the Capital Directive is followed by a discussion of the implementation of the rules laid down in the Directive in the national laws of each Member State, each in accordance with a common format and contributed by a practitioner from that State.
