*Butcher of Hanover: Fritz Haarmann Jun 25 2019 Killer Queens is a new series of historical fiction books based on true stories. The series explores the world of murder in the gay community, whether the victims or the killers themselves and sometimes both, are homosexual. Book 2 of the series focuses on the serial killer of at least 27 young men and boys in Germany in the post-World War 1 era. At the center of this murder case were Fritz Haarmann and Hans Grans, who were lovers while committing these murders. It wasn't until the skulls and bones started washing ashore from the Leine River in Hanover that Germany realized they had a cold-blooded serial killer in their country. Unlike Leopold and Loeb murder case covered in Book 1, where the dominance shifted from one to the other, Fritz Haarmann was the dominant partner in this case. He carried out each of the murders and dismemberment of the bodies himself, even though he claimed that Grans chose who was to be murdered in court. As you read the exploration of the case in this book, ask yourself, did Haarmann murder each victim to keep his lover Hans Grans to stay with him? Did Grans decide who it was that was to be murdered? The evidence on this case will keep you on the edge of your seat, trying to determine who was really behind these gruesome murders.*

*You Want Women to Vote, Lizzie Stanton? Jul 31 2022 This biography of Elizabeth Cady Stanton is as spirited as the women's rights pioneer herself. Who says women shouldn't speak in public? And why can't they vote? These are questions Elizabeth Cady Stanton grew up asking herself. Her father believed that girls didn't count as much as boys, and her own husband once got so embarrassed when she spoke at a convention that he left town. Luckily Lizzie wasn't one to let society stop her from fighting for equality for everyone. And though she didn't live long enough to see women get to vote, our entire country benefited from her fight for women's rights. "Fritz imparts not just a sense of Stanton's accomplishments but a picture of the greater society Stanton strove to change. *Fritz Scholder* Oct 29 2019 Now available again, this stunning volume examines the life and work of Fritz Scholder, the most influential, successful, and controversial Native American artist of the twentieth

century. In the 1960s and '70s, the notion of American Indian art was turned on its head by artists who fought against prejudice and popular clichés. At the forefront of this revolution was Scholder (1937-2005), whose portrayals of Native American life combined realism, tragedy, and spirituality with the genres of abstract expressionism and pop art. This volume features hundreds of works from Scholder's career as a painter, printmaker, and sculptor. Essays explore the artist's major themes—humanity's place in the natural world, ancient mythical beings, women, Christian iconography, the millennium, and the afterlife as well as Scholder's role in the Native American community and the art world. A fascinating figure who fearlessly took on his own contradictions and those of his times, Scholder continues to generate passionate discussion. *Fritz Scholder: Indian/Not Indian* offers a lively, insightful exploration of his place in twentieth-century American art history as a colourist, expressionist, and figurative painter.

*Fritz Apr 15 2021 Fritz Perls described himself as a "mediocre psychoanalyst" who became "the possible creator of a 'new' method of treatment"—Gestalt Therapy. His wife described him as half prophet, half bum. Dave Rybeck, reviewing FRITZ in Psychology Today, said that "Martin Shepard has done an excellent job of getting into, on top of, and under the Fritz Perls mystique. He spent two years learning all he could about Perls's life and has produced a masterful yet loving portrait that goes far beyond biography. FRITZ offers a Fritz Perls to whom few, if any, were privy. This holistic view of Fritz, his early falterings, his neurotic rootlessness, his prima donna pettiness, his chronic self-doubts and, above all, his driving destiny to become a great master in the world of psychotherapy, reveals a human, lovable person. It leaves me feeling glad that Fritz did his thing. And that Martin Shepard did his, too."*

*The Goose Fritz Jun 17 2021 A man obsessively investigates the mysteries of his family's past in this "brave and unflinching" novel by the acclaimed Russian author of Oblivion (The Financial Times). Sergei Lebedev's first two novels, The Year of the Comet and Oblivion, established him as one of Russia's most important contemporary novelists. Now he reaffirms that status with this third work of fiction. The Goose Fritz tells the story of a young Russian named Kirill, the sole survivor of a once numerous clan of German origin, who delves relentlessly into the unresolved past. When Kirill's ancestor, Balthasar Schwerdt, migrated to the Russian Empire in the early 1800s, he brought with him the practice of alternative medicine. He was then taken captive by an erratic nobleman who supplied entertainment to Catherine the Great in the form of dwarves, hunchbacks, and magicians. Searches archives and cemeteries across Europe, Kirill's investigation takes us through centuries of turmoil during which none of Schwerdt's descendants can escape their adoptive country's cruel fate. Illuminating both personal and political history, "Lebedev muses in Tolstoyan fashion about [how] the actions of distant ancestors can fix the destinies of people hundreds of years later" (The Wall Street Journal).*

*Terraria Gigantica May 17 2021 In a new approach to environmental photography, Dana Fritz explores the world's largest enclosed landscapes: Arizona's Biosphere 2, Cornwall's Eden Project, and Nebraska's Lied Jungle and Desert Dome at the Henry Doorly Zoo. In these vivaria, plants are grown amid carefully constructed representations of the natural world to entertain and educate tourists while also supporting scientific research. Together, these architectural and engineering marvels stand as working symbols of our complex relationship with the environment. Giant terraria require human control*

of temperature, humidity, irrigation, insects, weeds, and other conditions to create otherwise impossible ecosystems. While technical demands inform the design of these spaces, the juxtapositions of natural and artificial elements generate striking visual paradoxes that can go unnoticed. Here Fritz turns away from visitors' prepared sight lines, revealing alternate views that dispel the illusion of natural conditions. Inviting questions about what it means to create and contain landscapes, *Terraria Gigantica* inspires contemplation of our ecological future.
