Aug 06 2020 Alongside the traditional topics of international trade theory, this useful textbook integrates many topics usually omitted, and contains results of new research. It may be used at both undergraduate and graduate level, thanks to its unique "two-tier" structure: the text speaks directly to the undergraduate in extremely clear terms; while the appendices, which form the second tier, are addressed to graduate students and researchers. Each appendix is a self-contained treatment in mathematical terms of the topics examined in the text. Elements of International Economics May 03 2020 Modern economies become more and more open and the external sector of an economy becomes more and more important. This textbook aims at clarifying how an open economy functions, in particular at explaining the determinants of international flows of commodities and financial assets. All International Politics Is Local Feb 09 2021 How does regional interdependence influence the prospects for conflict, integration, and democratization? Some researchers look at the international system at large and disregard the enormous regional variations. Others take the concept of sovereignty literally and treat each nation-state as fully independent. Kristian Skrede Gleditsch looks at disparate zones in the international system to see how conflict, integration, and democracy have clustered over time and space. He argues that the most interesting aspects of international politics are regional rather than fully global or exclusively national. Differences in the local context of interaction influence states' international behavior as well as their domestic attributes. In All International Politics Is Local, Gleditsch clarifies that isolating the domestic processes within countries cannot account for the observed variation in distribution of political democracy over time and space, and that the likelihood of transitions is strongly related to changes in neighboring countries and the prior history of the regional context. Finally, he demonstrates how spatial and statistical techniques can be used to address regional interdependence among actors and its implications. Kristian Skrede Gleditsch is Assistant Professor of Political Science at the University of California, San Diego.

Entrepreneurial Marketing and International New Ventures Oct 08 2020 The book investigates the entrepreneurial marketing (EM) concept within the broader discipline of international entrepreneurship. The analysis of this concept, and designing a model of EM antecedents, elements, and outcomes that was tested on the basis of empirical studies covering companies from three European countries, explores and develops the field of international marketing and entrepreneurship. The book examines the role of entrepreneurial marketing in the internationalization processes of new ventures and adopts both qualitative and quantitative methods for analyzing the antecedents and characteristics of entrepreneurial marketing, as well as their relationships with internationalization activities and firms' performances. It goes on to show how the application of entrepreneurial marketing may lead to an accelerated internationalization of companies originating from a transition market, as well as the Western-European markets. It addresses these topics with regards to entrepreneurial marketing and management and will be of interest to researchers, academics, managers, entrepreneurs, and students in the fields of international business, international marketing, and entrepreneurship.

Governing Global Trade Mar 01 2020 Cohn's topic of global trade is of enormous and proliferating interest. He provides a good background from 1945 to the present and on core contemporary themes such as civil society participation and the domestication of the trade agenda. Whilst there is a wealth of literature on policy-oriented aspects such as negotiating rounds, there are few that provide the careful, comprehensive historical overview that this work offers and none that do so with reference to international institutions such as the G7, Quad, OECD, and UNCTAD as well as the WTO in global trade governance. This seminal work has been awarded the British Columbia Political Science Association Weller Prize for 2003. Cohn's political science background will appeal directly to a university audience and a broader public policy market. It is also suitable for those interested in trade in the cognates of economics and law. This work's theoretical framework embraces and synthesises the major approaches in the field of international relations and will be appropriate for the dominant schools of realists and liberal institutionalists alike. It could therefore be apt for courses on international relations theory or international political economy taught in a theoretical mode. This book reinforces and broadens the focus of all previous works in The G8 and Global Governance series.

International Business Jan 11 2021 Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Legal Aspects of International Drug Control Apr 13 2021 The need for suppressing the illicit traffic in drugs can hardly be over-emphasized. Yet, the licit uses of drugs, especially for medical and scientific needs, cannot be suppressed. Apparently, it is a question of determining the world requirements of drugs for such legitimate uses, and of producing and manufacturing them accordingly. Owing to their multifarious medical uses in various parts of the world, it proves to be almost impossible to determine exactly the amount of drugs required for legitimate purposes. There is also the complicating factor that drugs are used for sociological and religious reasons, which have a long history. Not only are the licit uses and legitimate amounts of drugs difficult to determine but also such difficulties give rise to illicit traffic in them. Yet, it is believed that a concerted international policy, coupled with national co-operation, on various facets of the related problems—namely, limitation of production and/or manufacture of drugs, restriction on cultivation of plants that may contribute to addiction-producing substances, training and rehabilitation of drug addicts, and efficient national administration—would help eradicate drug-abuse. In search of an appropriate remedy, this book has been devoted to a practical study of the problem and to exploring, in this area of international law, the relationship between the political and

economic interests and the international economic order.

Aspects of International Cooperation in Air Traffic Management Jan 23 2022 This volume discusses various institutional, legal and operational aspects related to the provision of air navigation services, taking particular consideration of the current implementation of a new generation of communications, navigation and surveillance systems for future air traffic management (CNS/ATM). The primary intent is to critically review the current mechanisms for international co-operation in this field. Particularly in Europe, many efforts have been undertaken to enhance air traffic management by harmonization and integration of national developments but many parties claim that these are still insufficient and the processes are still dominated by the individual States. Following a short description of the historical developments, the global framework of cooperation established through ICAO is described, supplemented with a description of some multilateral organizations active in the field of air traffic management on a regional basis. The basic technological and operational changes envisaged with the implementation of the Future Air Navigation Systems (FANS) are described and, based on these, related institutional and legal aspects are discussed. Particular emphasis is given to developments in Europe, where during the last four decades several initiatives for enhancing the cooperation of States could not overcome the fragmentation of the airspace. The decisions of February 1997 of the ECAC Ministers of Transport on an Institutional Strategy are reflected. One chapter is devoted to questions of liability in air traffic management which are of particular importance with regard to international cooperation.

Marketing Aspects of International Business Nov 01 2022 The old ways break down, times change, and new life blossoms from the ruins. Frederick Schiller These words of a great poet express a basic fact of life—the inevitability of change. If marketers were asked to envision the future, they would not hesitate to answer that the entire globe is involved in a human revolution like no other in history. The changes now taking place, in both industrially developed and developing nations, are indications of the problems, challenges, and opportunities confronting future economic growth and development. Perhaps the most prominent characteristic of this change is the growing economic interdependence of all nations. Today it seems quite unnecessary to point out that any nation's problems and opportunities anywhere are now every nation's problems and opportunities everywhere. This economic and business interdependence on a global scale is the new reality, regardless of whether we want to accept it. The task ahead for all corporate managers becomes one of adapting to this new international business reality. It also requires them to assume the leadership role in helping individuals of all nations to become more and more aware of their mutual need for another's products and services. Today every corporation, whether confined within one nation or not, operates in this dynamic, changing, international business environment.

Private International Law Aspects of Corporate Social Responsibility Nov 28 2019 This book addresses one of the core challenges in the corporate social responsibility (or business and human rights) debate: how to ensure adequate access to remedy for victims of corporate abuses that infringe upon their human rights. However, ensuring access to remedy

depends on a series of normative and judicial elements that become highly complex when disputes are transnational. In such cases, courts need to consider and apply different laws that relate to company governance, to determine the competent forum, to define which bodies of law to apply, and to ensure the adequate execution of judgments. The book also discusses how alternative methods of dispute settlement can relate to this topic, and the important role that private international law plays in access to remedy for corporate-related human rights abuses. This collection comprises 20 national reports from jurisdictions in Europe, North America, Latin America and Asia, addressing the private international law aspects of corporate social responsibility. They provide an overview of the legal differences between geographical areas, and offer numerous examples of how states and their courts have resolved disputes involving private international law elements. The book draws two preliminary conclusions: that there is a need for a better understanding of the role that private international law plays in cases involving transnational elements, in order to better design transnational solutions to the issues posed by economic globalisation; and that the treaty negotiations on business and human rights in the United Nations could offer a forum to clarify and unify several of the elements that underpin transnational disputes involving corporate human rights abuses, which could also help to identify and bridge the existing gaps that limit effective access to remedy. Adopting a comparative approach, this book appeals to academics, lawyers, judges and legislators concerned with the issue of access to remedy and reparation for corporate abuses under the prism of private international law.

*Modern Law of International Trade Dec 10 2020 This book presents a comprehensive and systematic study of the principal aspects of the modern law of international commercial transactions. Based on diverse sources, including legislative texts, case law, international conventions, and a variety of soft-law instruments, it highlights key topics such as the international sale of goods, international transport, marine insurance, international finance and payments, electronic commerce, international commercial arbitration, standard trade terms, and international harmonization of trade laws. In focusing on the private law aspects of international trade, the book closely analyzes the relevant statutes, case law and the European Union (EU) and international uniform law instruments like the Rome I Regulation, the UN Convention on the Contracts for the International Sale of Goods (CISG), UNCITRAL Model Laws; non-legislative instruments including restatements such as the UNIDROIT Principles on International Commercial Contracts, and rules of business practices codified by the ICC such as the Arbitration Rules, UCP 600 and different versions of the INCOTERMS. The book clearly explains the key concepts and nuances of the subject, offering incisive and vivid analyses of the major issues and developments. It also traces the evolution of the law of international trade and explores the connection between the *lex mercatoria* and the modern law. Comprehensively examining the issue of international harmonization of trade laws from a variety of perspectives, it provides a detailed account of the work of major players in the field, including UNCITRAL, UNIDROIT, ICC, and the Hague Conference on Private International Law (HCCH). Adopting the comparative law method, this book offers a critical analysis of the laws of two key jurisdictions—India and England—in the context of export trade. In order to stimulate discussion on law reform, it explains the similarities and differences not only between laws of the two countries, but also between the laws of India and England on the one hand, and the uniform law instruments on the other. Given its breadth of coverage, this book is a valuable reference resource not only for students in the fields of law, international trade, and commercial law, but also for researchers, practitioners and policymakers.*

Resuscitation Controversial Aspects Mar 25 2022 The First European Congress of Anesthesiology in Vienna, Austria in September, 1962 presented 19 Symposium discussions, each lasting approximately 3 hours. Unlike most of these panels, the one on Resuscitation was a free discussion on controversial topics, without presentation of formal papers. In spite of the spontaneity of the unrehearsed questions and answers, the participants felt that an edited version of this Symposium should be published. The reasons for publication included the international character of the group of participants and the recent general interest in respiratory and circulatory resuscitation. A presentation of accepted resuscitation techniques was omitted, because of lack of time and because the Symposium was held primarily for trained anesthesiologists, most of whom have first-hand experience with resuscitation and should be familiar with the accepted modern methods. Only controversial topics, which seemed to be of interest to those with personal experience in the application and the research of resuscitation, were included.

Examining Core Elements of International Research Collaboration Jun 15 2021 The globalization of science, engineering, and medical research is proceeding rapidly. The globalization of research has important implications for the U.S. research enterprise, for the U.S. government agencies, academic institutions, and companies that support and perform research, and for the world at large. As science and technology capabilities grow around the world, U.S.-based organizations are finding that international collaborations and partnerships provide unique opportunities to enhance research and training. At the same time, significant obstacles exist to smooth collaboration across national borders. Enhancing international collaboration requires recognition of differences in culture, legitimate national security needs, and critical needs in education and training. In response to these trends, the Government-University-Industry Research Roundtable (GUIRR) launched a Working Group on International Research Collaborations (I-Group) in 2008, following its meeting on New Partnerships on a Global Platform that June. As part of I-Group's continuing effort, a workshop on Examining Core Elements of International Research Collaboration was held July 26-27, 2010 in Washington, DC. One primary goal of the workshop is to better understand the risks involved in international research collaboration for organizations and individual participants, and the mechanisms that can be used to manage those risks. Issues to be addressed in the workshop include the following: (1) Cultural Differences and Nuances; (2) Legal Issues and Agreements; (3) Differences in Ethical Standards; (4) Research Integrity and the Responsible Conduct of Research; (5) Intellectual Property; (6) Risk Management; (7) Export Controls; and (8) Strategies for Developing Meaningful International Collaborations. The goal for the workshop and the summary, Examining Core Elements of International Research Collaboration, is to serve as an information resource for participants and others interested in international research collaborations. It will also aid I-Group in setting its future goals and priorities.

International Law Aspects of the European Union Jun 23 2019 The debate about the relationship between international and community law usually centres on the question of which of these two 'belongs' to the other, and how 'special' community legal order is in relation to international law. In this volume, a distinguished group of Finnish and British academics and practitioners break new ground by, instead of becoming mired in these questions, clearly examining the international law aspects of the activities of the Community and the Union. In doing so, they have elucidated points of connection and possible points of conflict. The result is a thought-provoking collection of essays which examines community law through the conceptual grid of international law, and thus enriches our understanding of the workings of both.

International Aspects of Fiscal Policies May 27 2022 This volume brings together nine papers from a conference on international macroeconomics sponsored by the NBER in 1985. International economists as well as graduate students in the fields of global monetary economics, finance, and macroeconomics will find this an outstanding contribution to current research. It includes two commentaries for each paper, written by experts in the field, and Frenkel's detailed introduction, which serves as a reader's guide to the arguments made, the models employed, and the issues raised by each contributor. The studies analyze national fiscal policies within the context of the international economic order. Malcolm

D. Knight and Paul R. Masson use an empirical model to show that fiscal changes in recent years in the United States, West Germany, and Japan have caused major disturbances in net savings and investment flows. Linda S. Kole uses a two-country simulation model to examine the effects of a large nation's expansion on exchange rates, interest rates, and the balance of payments. In other studies, Warwick J. McKibbin and Jeffrey D. Sachs discuss the influences of different currency regimes on the international transmission of inflation; Kent P. Kimbrough analyzes the interaction between optimal tax policies and international trade; Sweder van Wijnbergen investigates the interrelation of fiscal policies, trade intervention, and world interest rates; and Willem H. Buiter uses an analytical model to look at fiscal interdependence and optimal policy design. David Backus, Michael Devereux, and Douglas Purvis develop a theoretical model to investigate effects of different fiscal policies in an open economy. Alan C. Stockman looks at the influence of policy anticipation in the private sector, while Lawrence H. Summers shows the effects of differential tax policy on international competitiveness.

Growth and International Trade Jul 05 2020 This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored. The first part starts from the "old" growth theory and bridges to the "new" growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

The Global Business Handbook Aug 25 2019 A nation's economic success depends on the capacity of its companies and trading organizations to develop business relationships, trade and do business in the international arena. Doing business across borders subtly changes the processes and skills the successful manager needs. Cultural, social, geographic and legal factors serve to complicate the picture. The mantra for managers today is think global, act local. In this handbook the authors concentrate on the big developments that currently are happening at an international level. They consider how managers operating in the global business landscape must change what they do to create advantages and remain competitive. The Global Business Handbook is based on the structure of the very successful IÉSEG International School of Management's programme on international management. It includes a global focus, backed by the latest research on different aspects of international business carried out in different parts of the world.
